DUST EXTRACTION SYSTEMS

## Dear Customers,

Innovative technologies in the field of air purity and environmental protection in industrial sector have been the domain of **NAWARA** company since over 20 years. Independently, if it concerns dust extraction, transport, grinding, varnishing, air pollution from dust or construction of installations **NAWARA** company is the main leader and competent in many fields with customer, offering its customers high quality solutions in the field of dust extraction and environmental protection as well as managing with noise level and explosion hazards.

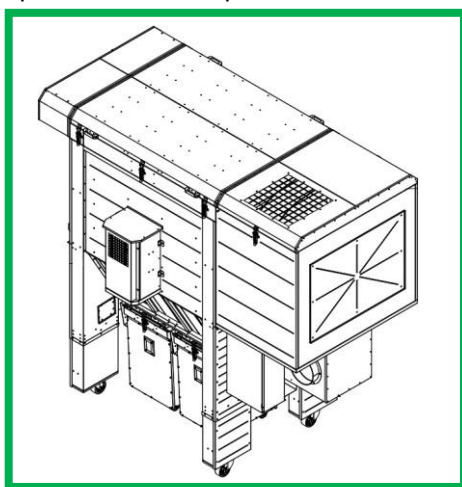

Example drawing of Vaco Max S 3000-3000+

## Technical data:

VACOMAX	fan 400V, 50Hz 3 fazes	Community Ø [mm]	Air efficiency [m³/h]	Dimensions length/width/height [mm]	Weight [kg]	Noise level [dB(A)]
<b>S1000</b>	4	200	2400	2889x1367x2815	~900	75
<b>S2000</b>	5,5	250	3800	3449x1367x2815	~1410	70
<b>S3000</b>	7,5	300	5400	3999x1367x2816	~1410	72
<b>S3000+</b>	11	350	7000	3999x1367x2816	~1550	72

## Advantages of Vaco Max:

- **VACO MAX is the underpressure mobile filter** (the fan is located on the „pure” side and has not contact with transporting material)
- **Long using-term of dust extractor** .The service life of filtration bags with using that system is 12 years.
- **Filtration bags** made of antistatic polyester needle felt, especially pays off in high containing dust case, etc. chipboard and MDF processing.
- Automatically turning on **filter regeneration with compressed air (standard**
- **Safety increased** throught automatical firefighting system with using powder extinguisher GP -4x ABC (**not causing water damage**). Extinguish device is on accordance with GS-HO 14.
- **Saving costs of heating** thanks to full warm recuperation near dust extraction installation in rooms.
- **Savings room** thanks to compact device construction. It is possible to put the dust extractor in the low room because of little height of the extractor.
- Control panel type V23 (star triangle) is included in the price.
- Autostart included in the price
- Return flap included in the price

**Vaco Max S1000**

## Price with pulse-jet regeneration system:

- 6-valves „bomb” shown in the picture
- The pressure can be adjusted depending on the filtering material
- Automatical cleaning filtration bags
- Venturi nozzles used

VACOMAX	Price with pulse-jet regeneration system
S1000	8.800 €
S2000	10.650 €
S3000	12.000 €
S3000+	13.000 €

**Payment conditions:** 50 % - after confirmation of the order  
50 % - 5 days before delivery

**Realization term:** till 6-8 weeks after signed order and transfer payment

**Clean air without compromise**
